April 23, 2015
10-11 CST

OMS-W04 Models Based Predictions of Tank Qualities Reduce Lab Operational Cost

Table of Content

- 1-Webinar Topic
- 2-Webinar Format
- 3-Webinar Objectives
- 4-About Offsite Management Systems LLC
- 5-Speaker's profile
- 6-Plant Tank Farm
- 7-Current Modes and Methods of Quality Analyses
- 8-Required Tank Information
- 9-Methods to Analyze/Estimate Tank Qualities
- 10-Method-1 Online Process Analyzers
- 11-Online Process Analyzers Features
- 12-Online/Lab Analysis for Run-down
- 13-Online Blending Analyzers
- 14-Conventional Online Analyzers for Gasoline Blending
- 15-Method-2 Tank Samples and Lab Analysis
- 16-Tank Samples and Lab Analysis Features
- 17-Definition of Lab Analysis Load
- 18-Example of Lab Schedule for Onsite Operations
- 19-Example of Lab Schedule for Offsite Operations
- 20-Frequency Distribution of SQS
- 21-Graphical Representation of SQS
- 22-A typical Refinery Lab Analysis Cost
- 23-Method-3 Model Based Tank Qualities Analysis
- 24-Model Based Tank Qualities Analysis Features
- 25-ROI Economics of Model Based Tank Qualities
- 26-Feed Forward Tank Qualities for Process Units
- 27-Example-Open Loop Diesel Run-down
- 28-Example-Open Loop Kero Run-down
- 29-Example-Open Loop Gasoline Blend
- 30-Example-Closed Loop Gasoline Blending
- 31-Example-Naphtha Blending
- 32-Composition Tracking
- 33-Multi-tanks Quality Tracking Display
- 34-System Interfaces and Modules
- 35-Salient Features
- 36-System Architecture
- 37-Feasible Modes and Methods of Quality Analyses
- 38-Published Case Study
- 39-System Parameters
- 40-Summary of System KPI
- 41-System Performance
- 42-Proven Benefits from the Installed System
- 43-Summary
